

vehicle user

vehicle submersion

Before 2/3 of the tires are locked, move the vehicle to a safe place and, in case of flooding, break the windshield using the steel rod for the driver's seat headrest and evacuate.

When escaping from a flooded vehicle

If the window is not broken, wait until the water level difference between the inside and outside of the vehicle is 30 cm or less, and then evacuate as soon as the vehicle door is opened.

Do not drive in heavy rain

If it rains 100mm per hour, distance signs cannot be identified for more than 100m, immediately move the vehicle to a safe place and wait until the rain subsides

underpass

If water starts to accumulate in the underpass, never enter, and upon entering, leave the vehicle and quickly evacuate.

Sewol Bridge Crossing

If water overflows the bridge, never enter and take a detour or wait in a safe place

When the vehicle is isolated, open the door on the other side of the rapids or break the window to escape

When using the underground space

Semi-basement housing, underground history and shopping district

Evacuate immediately in case of water rising to the floor or backflow from the sewer

underground parking lot

Vehicle movement is prohibited in case of rainwater inflow
*Absolutely prohibited from entering the parking lot for confirmation

basement stairs

Evacuate immediately if even a little bit of water flows in

*Immediately evacuate children and the elderly

When escaping from flooded space

If the water depth outside is above the knee, several people work together to open the door and evacuate quickly.

When escaping the flooded stairs

Before the adult calf height (about 40cm), if possible, wear sneakers and move quickly (If you do not have proper shoes, quickly escape with bare feet)

manager of multi-unit housing, etc.

normally

Installation of water barriers, installation of sandbags, water pumps, etc., prior designation of installers of flood control materials

during heavy rain

Install liner plates and sandbags quickly

Evacuation guidance

Immediate evacuation guidance in case of rainwater inflow into underground space, prohibition of entry
